

THE COMPLETE OIL & GAS
DECARBONIZATION PLATFORM

NeoCarbon

Measure The Physics. Prove Reductions. Protect Value.

Scope 1, 2 & 3
Multi-Scope
Accounting

OGMP 2.0
Gold Standard
Level 5

API 2021
Tier 3
Physics

100% Sovereign
On-Premise
Air-Gap

MODULE 01

Full-Spectrum Scope 1, 2 & 3

Direct accounting across 11 O&G categories: flaring, tank flashing, venting, pneumatic devices, combustion, and all 15 Scope 3 value-chains tiers.

MODULE 02

Tier 3 Hydrocarbon Physics

Built-in API 2021 equations of state (Vasquez-Beggs & Peng-Robinson), flare wind-assist DRE, amine AGR mass balance, and Monte Carlo uncertainty.

MODULE 03

Methane Intensity & OGMP 2.0

Automated Gold Standard Level 4/5 reconciliation combining bottom-up process physics with top-down satellite/drone scans and field intensity KPIs.

MODULE 04

Multi-Report Compliance & Air-Gap

1-Click verified audit exports: ISO 14064, GHG Protocol, CSRD, and EU Methane Reg 2024/1787. 100% On-Premise air-gapped security behind your firewall.

Hierarchical Oil & Gas Architecture: From Wellhead to Corporate Rollup

ENTERPRISE MULTI-SITE

1. Wells & Separators

Wellheads, flowlines, GOR, separator P/T telemetry

2. Gathering & CPF

Compression, amine AGR sweetening, TEG dehydrators

3. Crude & Condensate

Storage tank flashing (EOS), VRU recovery, flare stacks

4. Pipelines & LNG

Compressor seal venting, liquefaction, cargo tracking

5. Corporate Dossier

Consolidated intensity, ISO/GHG/CBAM audit seals

Oil & Gas Decarbonization Capability	NEOCARBON ENTERPRISE	Internal Field Excel (Manual Spreadsheets)	Generic ESG SaaS (Sweep / Watershed)
Complete Scope 1, 2 & 3 Multi-Scope Accounting? (Combustion, flaring, flashing, venting, power, 15 Scope 3 tiers)	✓ YES (Full 15 Categories)	✗ NO (Scope 1 only, unlinked)	⚠ Partial (Office spend only)
Native API Compendium 2021 Tier 3 Physics? (Vasquez-Beggs flash EOS, flare wind-assist DRE, amine AGR)	✓ YES (Thermodynamic Engines)	✗ NO (Broken flat formulas)	✗ NO (Generic DEFRA factors)
OGMP 2.0 Gold Standard Level 4/5 Reconciliation? (Reconciles bottom-up engineering with top-down satellites/drones)	✓ YES (Automated Gold L5)	✗ NO (Impossible in spreadsheets)	✗ NO (Tier 1-2 generic only)
Multi-Framework Reporting (ISO 14064, CSRD, CBAM)? (1-Click official dossier generation ready for KPMG/DNV audit)	✓ YES (1-Click Verified)	✗ NO (Rejected by verifiers)	⚠ Partial (No O&G compliance)
Statistical Anomaly Detection & Monte Carlo Error? (Z-score/IQR flags pipeline leaks and sensor drift automatically)	✓ YES (Z-Score & ±2.8% Error)	✗ NO (Undetected errors skew data)	✗ NO (No statistical screening)
Data Sovereignty & Air-Gapped Security? (Protects sensitive reservoir tests, well logs & production secrets)	✓ YES (100% On-Premise Air-Gap)	⚠ Leaks via USB & unencrypted email	✗ NO (Exported to foreign clouds)

Multi-Million Default Penalty Shield

Eliminates the punitive +35% to +60% EU default tax markup, preserving up to €38.5M per 1 Bcm of exported gas.

✓ **80% Reduction in Audit Duration & Cost**

Deterministic calculation engine provides an immutable audit trail with SHA-256 cryptographic verification seals.

☆ **Flare Monetization & VRU Payback Modeling**

Pinpoints top methane loss sources across assets, modeling capital payback for flare gas recovery and VRU installations.

Deploy Sovereign Oil & Gas Carbon Accounting in 15 Minutes

Provide one gas lab analysis sheet or monthly production report. Our team will model your facility live, calculate your exact Methane Intensity, and show you **your full emissions and financial profile on the spot.**
